

SeaChange Stock-Booster™ (Kelp Pellets)

SeaChange Stock-Booster™ (Kelp Pellets) are a stockfeed supplement, derived from Southern Ocean Seaweed, that contains 70 chelated minerals. The chelated minerals in SeaChange Stock-Booster™ (Kelp Pellets) are more readily absorbed by animals and help to support more robust health.

Seaweed collected from the pristine Southern Ocean is air dried and pelletised to lock in all the goodness of nature's fastest growing plants. It is the richest natural source of iodine and also contains selenium (lacking in most Australian soils, yet known for its detoxifying capacity). This unique blend of seaweed gives a superior mineral, vitamin and amino acid analysis for the benefit of your livestock.

Benefits

- Contains iodine which is an important element for thyroid function in all animals.
- Features a better vitamin profile that can be found in any land plant.
- Contains alginic acid, which naturally absorbs heavy metals and free radicals.
- Broad spectrum analysis including vitamins, minerals, complex carbohydrates and amino acids.
