

NTS Guano Granules™ G2

Fossilised seabird droppings offer a combination of soluble and slow-release phosphate in combination with dense mineralisation.

NTS Guano Granules™ G2 contains 11% phosphorus, which will not lock up and become insoluble. It also contains 20 – 25% calcium and good trace element levels, including 3170 ppm of zinc. NTS Guano Granules™ G2 is an excellent option for inclusion in planting blends as a proportion of the phosphate component is citrate-soluble.

Reactive rock phosphate can take two years to release its phosphorus load, and in alkaline soils it will never become plant-available. NTS Guano Granules™ G2, by contrast, combines rapid-release characteristics with a controlled release pattern, to ensure adequate phosphate supply throughout the season.

Benefits

- Biological Farmers of Australia (BFA) Registered Product 456AI.
- Combines rapid-release characteristics with a controlled release pattern, to ensure adequate phosphate supply throughout the season.
- Ideal for use as a granulated starter P.
- Contains a percentage of citrate-soluble phosphate and can be used as a highly effective starter phosphate.
- Unlike chemically treated commercial phosphates, which contain problem levels of the heavy metal cadmium, NTS Guano Granules™ G2 are comparatively cadmium-free.
- Ideal for organic growers seeking a soluble phosphate kick-start.

PACKAGING

Contact NTS for pack sizes.
Product Code: NTSGGG2

NTS Guano Granules™ G2

Application Rates

Soil: 100 kg – 1 tonne per ha

Miscellaneous

- **Other Names:** Natural calcium phosphate, guano phosphorus.
- NTS Guano Granules™ G2 is one of the only natural phosphate fertilisers which can be used effectively at planting as it contains citrate-soluble phosphate to provide that initial kick-start.

Typical Analysis w/w

Calcium.....	20 – 25% (or 28–35% CaO)
Phosphorus – Total	
.....	11% +/- 1 (or 25% P ₂ O ₅)
Carbon.....	4.5%
Sulphur.....	500 ppm
Manganese.....	42000 ppm
Iron.....	32000 ppm
Zinc.....	3170 ppm
Sodium.....	160 ppm
Magnesium.....	1800 ppm
Fluoride.....	<300 ppm
Nitrogen.....	<1000 ppm
Copper.....	890 ppm
Potassium.....	2010 ppm
pH.....	8.0 (1:5 water extract)
Particle Size.....	2–5 mm granule
Appearance.....	Light tan granule
