

# Nutri-Gyp™ Natural Gypsum

**A natural gypsum which is rated Grade 1.**

Chemical gypsum, derived from the manufacture of phosphate fertilisers is no longer recommended for many crops, as it has finally been acknowledged that the cadmium content of this product is a problem. Nutri-Gyp™ Natural Gypsum is the solution. The natural form of this clay-buster is infinitely more soil-friendly than chemical gypsum. Nutri-Gyp™ Natural Gypsum (calcium sulphate) is an invaluable, irreplaceable product in high magnesium, high sodium soils - the prevailing soil type in many agricultural areas today. The calcium content helps open the soil, while the sulphate component helps remove excesses of sodium and magnesium.

## Benefits

- BFA certified version available (one tonne minimum buy).
- Very low moisture levels compared with chemical gypsum which can contain up to 40% moisture.
- An inexpensive source of sulphur.
- Soil-friendly.
- Microbe friendly.

## PACKAGING

**25 kg, 1 tonne pallets of 25 kg bags, bulk (loose) in truck loads**  
Product Code: NG

# Nutri-Gyp™ Natural Gypsum

## Application Rates

**Soil:** 500 kg - 2 tonnes per ha (broadcast)

## Miscellaneous

- **Other names:** calcium sulphate, anhydrite gypsum, anhydrous gypsum.
- Not compatible with strong acids and aluminium.

## Typical Analysis w/w

Calcium .....	21%
Sulphur .....	16%
Solubility .....	Slight (0.1 to 1%)
Particle Size .....	>0.5mm
Appearance:	White powder
