

NTS Micronised Humic Acid WP™

A processed concentrate containing humic acid in slow-release form.

This micronised source of humic acid has been extracted from compressed, ancient plant matter in the form of leonardite (a soft brown coal). This product also contains good levels of fulvic and ulmic acids, making this an exceptional quality base product. It is an ideal additive to boost bio-activity and improve the performance of compost or composted fertilisers. The composting process speeds the release of the humic and fulvic acids.

Benefits

- Biological Farmers of Australia (BFA) Registered Product 456AI.
- Offers all of the numerous benefits of humic acid.
- Humic acid can help to stabilise inputs throughout the crop cycle.
- This product still retains the high levels of broad-spectrum minerals that were part of the ancient plants from which it was derived.
- Can be applied directly to the soil at any time to help buffer excesses or toxins or to promote soil life (fungi).
- A source of broad-spectrum mineralisation.
- Helps buffer excesses or toxins.
- Promotes soil life, especially fungi.
- A source of soil carbon.
- Stabilises fertiliser inputs throughout the crop cycle .
- Can be used at any time for a synergistic effect with granular fertilisers, especially soluble fertilisers.

PACKAGING

**25 kg, 1 tonne pallets
of 25 kg bags**

Product Code: NTSMHAWP

NTS Micronised Humic Acid WP™

Application Rates

Foliar: 1 kg per hectare
Soil/Fertigation: 2 - 3 kg per hectare

WARNING: May stain foliage and/or fruit.
Avoid spraying close to harvest.

Miscellaneous

- NTS Micronised Humic Acid WP™ is only slightly soluble in water.
- The product should not be confused with soluble, rapid-acting potassium humates.

Typical Analysis w/w

Humic acids (dry basis).....	70%
Moisture	15% max
Ash.....	10% max
pH.....	5.5
Conductivity.....	0.69 mS/cm
Solubility.....	>5%
Particle Size	Screened to 8 micron
Appearance:	Dark brown powder
