

Nutri-Kelp™ Powder

The world's most potent seaweed fertiliser concentrated into a 100% soluble powder.

Derived from *Ascophyllum nodosum*, harvested from the clean, cold North Atlantic waters, this is the highest analysis kelp product in Australia. Available in a 100% soluble powder, which reduces transport costs, this seaweed fertiliser can be used through irrigation or as a highly productive foliar fertiliser. Kelp is a natural source of auxins, cytokinins and gibberellins, and these ingredients, in conjunction with the comprehensive range of trace elements, amino acids and chelating agents found in kelp, can provide many benefits. Kelp also contains complex carbohydrates which are a powerful microbial promotant – the fungal component of the soil can be boosted with Nutri-Kelp™ Powder.

Benefits

- Biological Farmers of Australia (BFA) Registered Product 456AI.
- Can be a valuable rescue remedy during periods of stress.
- Improves crop quality and associated shelf-life.
- Boosts soil life activity, particularly the fungal fraction.
- Reduces maturation time.
- Increased brix levels may increase cold tolerance in some crops.
- Increases brix levels with an associated reduction in insect attraction
- Offers DIY chelation, as it contains a chelating agent called mannitol.
- Contains broad-spectrum trace elements in naturally chelated plant available form.
- Boosts flowering and improves the flower to fruit ratio.

PACKAGING

300 g, 1 kg, 7 kg, 20 kg
Product Code: NK

Nutri-Kelp™ Powder

ALLOWED INPUT 456AI

**BFA
REGISTERED
PRODUCT**

Application Rates

Foliar

Small Crops, Turf & Vines: 250 g per ha
(applied every 1-2 weeks)

Orchard Crops: 500 g per ha
(applied every 4 weeks)

Broadacre: 100 - 200 g per ha
Minimum Dilution 1:1000 (1 g/L or 100 g/100 L)

Fertigation

1 kg per ha

Rooting Powder

Dip cuttings in a 1:1000 solution

Seedling Treatment

Dip seedlings into a 1:1000 solution to reduce transplant shock, or fertigate immediately after planting at 1 kg/ha. For home gardens, add a teaspoon of kelp to 4 L of water and water plants in after transplanting with 1 - 4 L per plant, depending on plant size.

Typical Analysis w/w

Total Nitrogen (as organic N)	1 - 1.5%
Total Phosphorus (as organic P)	0.02 - 0.05%
Total Potassium (as organic salts)	19 - 21%
Sulphur	3 - 9%
Magnesium	0.5% - 0.9%
Calcium	0.5 - 1.0%
Copper	1 - 6 ppm
Boron	20 - 100 ppm
Iron	50 - 200 ppm
Manganese	5 - 12 ppm
Zinc	10 - 100 ppm
Molybdenum	1 - 5 ppm
Moisture	2 - 8%
Crude protein	6 - 8%
Carbohydrates	35 - 50%
Ash	40 - 55%
Alginic acid	10 - 20%
Mannitol	4 - 7%
Betaines	0.1%
Cytokinins	0.06%
pH	9.5
Specific Gravity	1.11
Conductivity	72 mS/cm
Solubility	100%
Appearance:	Dark brown/black flakes <2mm

Miscellaneous

- Suggested rates and dosages are approximate and may vary depending on the climatic region, soil type and fertility. Additional applications can be made immediately prior to or following stress periods such as frost or drought. It is preferable to increase the frequency of applications rather than the concentration of the solution. Lower dilution rates should be applied to less dense foliage. Increase to higher rates as foliage matures.
- Nutri-Kelp™ is compatible with most insecticides, fungicides and fertilisers but, when chemical interaction is unknown, a jar test should be conducted. pH adjustments may be required with acidic mixtures.
- Excellent storage capacity. However open containers or plastic bags should be closed and stored in a dry location away from sunlight.
- Avoid spillages on floor as product becomes very slippery when mixed with water and may create a hazard.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The buyer assumes all responsibility for the use of any NTS products.
