

Farm Saver® Iron Fulvate

LOW PRICE – HIGH QUALITY

**Iron – one of the most abundant elements in the universe –
is often not available to plants.**

Luxury levels of iron can deliver two or three shades of deeper green to the plant. This chlorophyll density is a major determinant of yield and quality. Farm Saver® Iron Fulvate features chelated iron with kelp, fulvic acid and a full range of trace elements.

BENEFITS

- Iron is required for chlorophyll density, nitrogen-fixation and protein.
- Fulvic acid and kelp are powerhouse plant growth promoters.

INSTRUCTIONS

Stir well before use. Rates and frequencies should be adjusted according to crop monitoring. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.
