

SeaChange Liquid Kelp™

Cold-composted Australian Bull Kelp – high quality and extremely well priced.

**NATURAL
SOIL-LIFE
AND PLANT
GROWTH
PROMOTERS**

Liquid Australian Bull Kelp *Durvillaea potatorum*, manufactured with a proprietary processing system. The 90-day cold-composting process retains all of the natural attributes of bull kelp, with none of the denaturing features inherent in some other manufacturing procedures that involve heat and alkaline extraction. The attributes include: minerals, amino acids, natural growth promotants, chelating agents and complex sugars. This product has been developed as part of an NTS quest to reduce the costs to the Australian farmer of the core components of biological agriculture.

BENEFITS

- Australian Certified Organic (ACO) Registered Farm Input 456AI.
- Kelp is a core component in biological agriculture. It is an indispensable bio-promotant which can provide:
 - Frost resistance.
 - Bio-balancing.
 - Root promotion.
 - Improved flowering & fruit set.
 - Stress resistance.
- A concentrated liquid blend of microbially digested bull kelp retaining all of the plant growth supporting capacity of this remarkable natural fertiliser.

PACKAGING:

1 L, 5 L, 20 L,
200 L, 1000 L

Product Code:
SCLK

SeaChange Liquid Kelp™

APPLICATION RATES

Foliar Spray:

Vegetables

1 L per 100 L water up to 5 L/ha equivalent
Apply weekly or as required

Orchards & Vineyards

1 L per 100 L water up to 7 L/ha equivalent
Apply every 2 – 4 weeks or as required

Ornamentals & Turf

1 L per 100 L water up to 5 L/ha equivalent
Apply every 2 – 4 weeks or as required

Broadacre Crops

2 – 3 L/ha in 80 – 100 L water, depending on canopy
closure, apply as required

Pasture

2 – 3 L/ha in 80 – 100 L water, apply as required

Spot-Spraying

50 mL per 10 L water, apply as required

Fertigation:

Vegetables

10 – 20 L/ha
Apply weekly or as required

Orchards, Vineyards, Ornamentals & Turf

10 – 20 L/ha
Apply every 2 – 4 weeks or as required

Home Garden Application:

Dilute 30 mL per 9 L watering can and apply the
diluted mix at a rate of 1 litre per square metre
Apply fortnightly or as required

Tree Tubestock or Vegetable Seedling Treatment:

Soak roots in 1:150 dilution

STORAGE & HANDLING

- Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form. Seal lid/cap immediately after use.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing, application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The Buyer assumes all responsibility for the use of any NTS products.

TYPICAL ANALYSIS W/W

Total Potassium (K) (as organic)	1.39%
Calcium (Ca)	0.09%
Magnesium (Mg)	0.09%
Iodine (I)	22 mg/L
SG	1.0
pH	3.6 – 4.6
Conductivity	30 – 50 mS/cm
Appearance	Brown liquid

INSTRUCTIONS

Shake or stir well before use. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

IMPORTANT

- Contains some larger particles (up to 100 micron) which may block fine spray nozzles. Some separation may occur over time. Agitate well during application to ensure solution is homogenous.
- Avoid spraying close to harvest if produce is susceptible to staining.
- **Note:** Product in 1000 L tanks may weigh over 1 tonne. Forklift with 2 tonne lifting capacity is recommended.
